

Prague Summer School on Nonlinear Spectroscopy 2026

Poster Session

#	Presenter <i>Poster Title</i>
1	Vittoria Burigana <i>Substitution and Environmental Effects on the Ultrafast Relaxation Dynamics of Red-absorbing Squaraines</i>
2	Gabriel Häusler <i>Structure-based theory of energy transfer and transient absorption anisotropy of the chlorophyll a pigments in peridinin-chlorophyll a protein</i>
3	Kennet Rueda Espinosa <i>Theory and Simulations of Atomic Force Microscopy-Based Two-dimensional Electronic Spectroscopy</i>
4	Liuyue Yang <i>Experimental Realization of Transient Spectroscopy on Multiple Timescales</i>
5	Miriam Jänchen <i>Mechanistic Insights on Photoinduced B-Cl Bond Homolysis within Pyridine-BCl₃ complexes</i>
6	Xiangyu Xu <i>Exact Reaction Coordinate Mapping: Importance of the Dissipative and Dispersive Contributions</i>
7	Joseph Davies <i>Intra-Defect and Defect-Lattice Coupling in Diamond Revealed by Two-Dimensional Infrared Spectroscopy</i>
8	Anitta Benoy <i>Resolving Higher-Order Nonlinear Responses in HBI J-Aggregates by Transient Absorption Spectroscopy</i>
9	Maria Francesca Cherchi <i>Selective Q-Band Excitation Modulates Exciton–Exciton Annihilation in Tetra-(p-Sulphonato)-Phenyl-Porphyrin J-Aggregates</i>
10	Jakob Simon Kapp & Vivek Bhat <i>Ultrafast Two-Dimensional Fluorescence Excitation Spectroscopy (2D-FLEX)</i>
11	Anton Kliuchynskyi <i>In the Heart of CH: Spectroscopic Insights into Proper C-H Hydrogen Bonding</i>
12	Gijsbert A. H. ten Hoven <i>Fourth Order Extension of Incoherent Exciton Population Transfer</i>
13	Stephanie Gonzalez-Migoni <i>Probing ultrafast dynamics using coarse-grained simulations of F-2DES</i>
14	Natalia Gray <i>Exploiting photon correlations to investigate the quantum nature of energy transfer</i>
15	Arunjyoti Baidya <i>Operator-based exciton–vibrational modelling of Rhodobacter sphaeroides bacterial reaction center using Nonlinear Exciton Equations with mean-field and one-quantum closures</i>
16	Felix Kohl <i>Exciton-Exciton Annihilation in R18-Loaded Organic Polymer Nanoparticles</i>
17	Michael Hofer <i>Light harvesting in photosystem I trimers of far red light-adapted cyanobacteria</i>
18	Alina Bach <i>Two-State Model for Peridinin</i>
